

WAREWASHING  
RACK-TYPE DISHWASHER

# PROFI CS

EFFICIENT - RELIABLE - INNOVATIVE

  
made in germany

## MADE IN GERMANY

„Made in Germany“ has been synonymous with quality and reliability in the premium segment for a long time and still is today. A company can only maintain its hold on the market by keeping its promise to continually deliver high quality.

## WORLDWIDE

Whether you need a completely new kitchen or a replacement item our competent subsidiaries and partners all over the world would be pleased to support you. It's nice to know we are always there.

1883 Mr. Charles Clarence Hobart builds his first engines and generators in Middletown, Ohio.

1886 J.C. Cochran receives the patent for the first dishwasher.

1897 The HOBART ELECTRICAL MANUFACTURING COMPANY was founded in Troy Ohio, through the acquisition of the engine and generator factory of the HOBART family.

1903 HOBART builds the first food processor (a self-contained powered coffee mill).

1926 HOBART purchases The Crescent Washing Machine Company, and enters the commercial warewashing market: the first warewashing machine carrying a HOBART label.

1930 Foundation of the HOBART MASCHINEN GESELLSCHAFT in Hamburg, Germany.

1953 HOBART receives the patent for the first flight-type dishwasher.

1960 Acquisition of the dishwashing department of the company K. Martin, Offenburg, Germany.

1980 Production plant in Elgersweier, Germany, was newly built.

1986 PREMARK INTERNATIONAL GROUP was formed in Deerfield, Illinois.

1997 HOBART CORPORATION'S 100th anniversary.

1999 Integration of PREMARK into ITW.

2004 HOBART relocates to Elgersweier

2006 Launch of HOBART's export activities

2007 HOBART's PREMAX line begins a new chapter in the annals of dishwashing technology. The PREMAX FTP flight-type dishwasher cuts water use by up to 50%, energy use by up to 30%, and use of chemicals by up to 80%.

2009 HOBART introduces the SENSOTRONIC, the world's first intelligent dishwashing technology

2010 Tenth record year in succession for HOBART

## HOBART PHILOSOPHY

### UNDERSTAND – SIMPLIFY – FOCUS – INNOVATE

This philosophy provides the continuing motivation to develop innovations, which are the best driver of economic development and a guarantee for job security. It is a philosophy of the essential, of customer value, of simplicity. A philosophy built on the conviction that things created for a purpose and with logic, do not need to be completely renewed, but must instead be subject to continuous evolution.

## HOBART VISION

### “WASH WITHOUT WATER“

Before PREMAX, a flight-type dishwasher with a 50% water saving would have been utopia. At HOBART, efficiency and responsible use of natural resources when developing new machines have always gone hand in hand. With PREMAX, the company has set a further milestone, and has further extended its leadership in innovation. But even so, HOBART is not satisfied with this. The company will not diminish the pace of its innovation, and will look for further opportunities to save even more. When the day arrives that a machine is able to wash without water, we already know, it will be a PREMAX.

## HOBART FOCUS

### INNOVATION

Without the readiness to invest in the future, without the natural reaction of always questioning ourselves, without interdisciplinary basic research and consistent customer focus, PREMAX would be inconceivable. Worldwide, over 300 research and development engineers and global marketing teams, who identify customer requirements, as well as the company's own Tech-Center, with over 1,000 patent applications annually, develop innovative technology and make PREMAX possible.

### ECOLOGY

The HOBART environmental protection program CO<sub>2</sub>NSEQUENT has been in existence for some time. The program includes a large number of measures that are all related to protecting the environment. These measures are implemented in production, purchasing, the development and sale of products and in additional projects.

### ECONOMY

Already in the early 1980s our E-formula set standards in energy saving and recovery which are still unique today. This innovative spirit found its fulfillment in the PREMAX line. The PREMAX flight-type dishwasher saves up to 50% water, 30% energy, and 80% chemicals in comparison with conventional technologies, making HOBART a model in terms of efficiency and economy.

4

1 „For us, automated processes guarantee satisfied customers. And the same goes for our warewashing area. The PROFI CS fulfils our requirements ideally, and its simple operation expedites the entire handling process.”

2 „Our previous hood-type dishwasher often slowed us down in peak times, having reached its capacity limit. The PROFI CSA has an appreciably higher capacity, despite its lower space requirements. Since it has been in use in our kitchen, everything has been running smoothly.”

3 „We employ many part-time staff in our dishwashing area. Because the PROFI CS is so easy to operate, this is possible without long training. The machine is as reliable as a Swiss watch.”

4 „We have realised our dream of running our own restaurant. We are aware of the risks. We wanted a reliable, inexpensive dishwashing solution and we found exactly what we were looking for in the PROFI CS.”

## 1 | WASH RESULT

**PATENT  
PENDING**

### POWERFUL WASHING

The combination of four upper and three lower wash arms leads to perfect results.

### THOROUGH DUAL RINSE

A second rinsing zone is integrated prior to the actual final rinse. Here, the fresh water collected in the receiving pan is used a second time in an additional pre-rinse. The optional dual rinse ensures a sparkling wash every time.

### WIDE ANGLE NOZZLE FAN

Wash efficiency depends largely on the distribution of the wash water and on avoiding any masked areas. Spraying angles and the precision of the wash jets are vital factors in achieving a powerful, searching wash action and the HOBART designed wide angle nozzles FAN provide a substantially wider and more precise spray pattern. Compared with

conventional and fixed wash arm systems the wash water is distributed more efficiently, masking is avoided and the wash result, especially in the corners, is considerably improved.

### NON-CLOGGING NOZZLES

The indented nozzles cannot be obstructed, resulting in a constantly powerful wash and perfect quality results.

### PRACTICAL DRIER

A perfect wash means not only sparkling clean, but also dry tableware. The optional drier fulfils this requirement quickly and meticulously, allowing rapid reuse of all washed items.

## SPARKLING – CLEAN

Best wash result due to 4 wash arms above and 3 wash arms below.

The nozzle geometry of the wide angle nozzle FAN was calculated in numerous simulations.

## DRY – HOT

Fresh water is collected in the receiving pan and reused for an additional pre-rinse.

The curtains are marked distinctively.

**HOBART**

## 2 | HANDLING

### CLEAR OPERATING PANEL

Turn on and start at the touch of a button. All other important functions are performed by the controller. A temperature display can be included if required.

### DROP-IN WASH SYSTEM

Easy to take out and insert.

### BAYONET WASH ARM CATCH

Wash arms can easily be opened and closed to simplify cleaning.

### CODED WASH AND RINSE ARMS

The wash and rinse arms are clearly designed to prevent risk of confusion when inserting.

### CODED CURTAINS

Easy to take out and insert. The clear marking on the wash curtains prevents confusion when inserting.

## 3 | ECONOMY

**PATENT  
PENDING**

### ENERGY-MANAGEMENT EFFICIENT

A conventional rack-type dishwasher loses 40% of the energy available in the machine via the exhaust system. The distribution of water and the air stream have a considerable influence. The new energy-management EFFICIENT reduces the evaporation loss. The improved arrangement of the wide angle nozzles FAN and the orientation of the wash arms reduce the air flow within the machine. The patent pending wide angle nozzle FAN spreads out a 65% wider and more even spray pattern. Therefore the recirculation of water can be reduced for the same wash result. In order to keep the system in balance less air/water steam has to be exhausted. The new energy-management reduces the energy loss of the rack-type dishwasher by up to 15%.

## OBVIOUS – SIMPLE

The clearly laid-out controls make for easy operation.

## ECONOMICAL – EFFICIENT

Up to 65% wider and more even spray pattern.

## 4 | TECHNICAL DATA

Racks (number/h)	Conveyor speed (m/min)	Water consumption*		Energy consumption (connected load) [kWh; (kW)] with heat recovery	Recommended model selection	Total length  (in mm without drying zone)
		(l/h)	(l/rack)			
90 / 120 *	0,67 / 1,0 *	230	2,6	31,0 (33,8)	CS-A	1.350
100 / 150 *	0,83 / 1,25 *	240	2,4	31,0 (34,1)	CSE-A	1.850

\*Using dual rinse

WAREWASHING  
RACK-TYPE DISHWASHER

**PROFI CS**

**EFFICIENT – RELIABLE – INNOVATIVE**

## **SIMPLE – STRONG – RELIABLE**

The PROFI CS is HOBART's smallest rack-type dishwasher and stands for top quality and absolute reliability.

If the capacity of a hood-type dishwasher is not sufficient to meet your needs, the PROFI CS is the perfect solution.

By using the optional heat recovery, you can save up to 7 kWh in energy.
